## **SITE DESCRIPTION: (500 characters or 70 words)**

Between 1968 and the early 2000's, Kleiner Metal Specialties (KMS) manufactured small metal parts used for the medical, aerospace and automobile industry. Documentation indicates that KMS stored and used tetrachloroethene (PCE) on site from 1968 to approximately 1986. Wastes generated at the site were disposed into a septic tank until 1980, when KMS connected to a municipal sewer system.

In 1982, PCE was detected in a home on Franklin Street, located approximately 600 feet southwest of Kleiner Metals. The NJDEP conducted additional potable well sampling of area wells throughout the 1980's and early 1990's and discovered that other residents had been impacted. In 1990 a public water line was provided to many of the residents.

Based on this information, a Site Investigation is recommended.
